U.S. Patent and Trademark Office PTOL-326 (Rev. 1-04)

Election/Restrictions

There are a plurality of disclosed patentably distinct species comprising:

- 1) Figures 1A-C
- 2) Fig 13A-D
- 3) Fig 14A-C
- 4) Fig 14D-F
- 5) 16A-J
- 6) 18A-B
- 7) 19A-B
- 8) 20A-D

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Currently there is no generic claim to all the species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mike Pape on 9/7/04 a provisional election was made without traverse to prosecute the invention of species 6, claims 1-4.

Affirmation of this election must be made by applicant in replying to this Office action.

DETAILED ACTION

Specification

The disclosure is objected to because:

- 1) Page 5, line 3, the term "adjustable" should be --adjust--, and the term --of--should be inserted directly after the term "position".
 - 2) Page 5, line 15, reference numeral "28" should be --26--.
 - 3) Page 8, line 8, the term "busing" should be --bushing--.
 - 4) Page 9, lines 16 and 17, the Figure number "13C" should be --13D--.
 - 5) Page 10, line 19, the Figure number "16H" should be --16J--.
 - 6) Page 10, line 24, the Figure number "17D" should be --17C--.

Appropriate correction is required.

Drawings

The drawings are objected to because in Figure 3C, reference numeral "22" should be --24--. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the

drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by DeBruyn (4,720,198). DeBruyn shows a wall plate (14), a mount plate (13), an articulated linkage between the wall plate and mount plate including a plurality of support elements (15 and 16), and a plurality of adjustable drag tapered bearings each pivotable around a separate axis. The bearings include a tapered spindle (36), a tapered bore (28) and a means for providing an adjustable axial force (45) between the spindle and bore to control friction.

Application/Control Number: 10/750,707 Page 5

Art Unit: 3632

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sakai	U.S. Patent	4,882,959
Elbert	U.S. Patent	5,306,093
Kida	U.S. Patent	6,381,808 B1
Chang	U.S. Patent	6,116,806
Maughan	U.S. Patent	6,146,045
Smith, Jr.	U.S. Patent	5,312,199
Oddsen, Jr. et al.	U.S. Patent	6,619,606 B2

The above patents all show various tapered bearings.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ingrid M Weinhold whose telephone number is 703-306-5762. The examiner can normally be reached on Mon-Tues 5:30AM - 4:00PM Eastern Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leslie Braun can be reached on 703-308-2156. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
